PROJECTS

Nameless*

[GitHub](#)

Discord.py, Prisma, Ruff

- A customizable and feature-rich Discord bot focused on usability, performance, and a rich multi-media experience.
- Engineered a high-performance Discord bot with Python 3.12, leveraging async/await and the Wavelink library for efficient Lavalink audio streaming.
- Implemented a robust command and plugin architecture, enabling features like cross-server chat and moderation tools, with data persistence managed by Prisma and SQLite.
- Automated code quality and linting using Ruff and GitHub Actions, ensuring consistent style and maintainability across the project.

Quart (Python)

- A reverse proxy, enabling content downloading, and on-the-fly modification.
- Engineered a rule-based modification system using decorators to dynamically inject custom JavaScript and CSS into proxied HTML content on the fly.
- Used Quart for asynchronous web handling.

Flutter, FastAPI, Firebase

- Developed Huoo, a cross-platform Flutter music player with local/remote playback, consuming a REST API and using BLoC for state management.
- Implemented a paginated, filterable search results screen with error handling and fallback logic to ensure a resilient user experience.
- Flutter for the front-end, FastAPI for the back-end and Firebase for authentication and data storage.
